DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

(Group 1): Claims 1-7 and 18-21, a method of capturing information in the building of queries that comprises of receiving an indication of a query; providing an interface and storing the annotation.

(Group 2): Claims 8-17, a method of sharing information useful in building queries comprising monitoring query components; search for annotations and providing an indication of annotations.

(Group 3): Claims 22-29, a system for sharing information useful in building queries comprising of an annotation database; a query building interface and an annotation system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
